Emma Carter CV
Software Developer

emmacarter@email.co

Experienced in Software Development with a focus on building scalable, high-performance applications.

TECHNICAL SKILLS:

- React
- Node.js
- CI/CD
- .NET

EXPERIENCE:

Software Developer (Intern) - NZ Tech
Project: Talent Insight Platform | Mar 2026

Built a web platform that supports job seeker profiles. The platform served over 12,000 users.

- Collected requirements from more than 150 jobs seekers and 40+ employers.
- Built production-ready **React + Node** microservice used by payroll and HR systems.
- Implemented **CI/CD** and monitoring; reduced deployment time by 50%.
- Collaborated with seniors; received employer reference.

Project TUX
Project TUX is an enterprise application suite for Transacting 60 million dollars of bookings and payments.

Project Talent
Talent app connects job seekers and employers. It also provides the functions for both candidate and employer processes.

Project Billion
Project Billion is a gamified learning platform that helps users learn coding through interaction, collaboration, and mentorship. Points earned from activities can be redeemed into career opportunities.
